

ATOMQUEST HACKATHON 1.0 — Final Submission

****Project Name:**** GoalOps

****Participant:**** Arnam Chaurasiya

****Tagline:**** An Enterprise Goal Setting & Tracking Portal with AI-powered coaching and strict mathematical governance.

1. Live Working Link

****Portal URL:**** <https://goal-ops-brown.vercel.app/dashboard>

2. Source Code Repository

****GitHub Link:****

<https://github.com/arnamchaurasiya/GoalOps>

The repository includes the full Next.js source code, the complete Supabase PostgreSQL 14-table schema (`/supabase`), and the comprehensive testing README mapping exactly how the solution fulfills the Problem Statement parameters.

3. Architecture Diagram

Below is the intended production architecture of the GoalOps platform, optimized for zero-idle costs using Vercel Serverless Functions and Google Gemini AI.
